

VICTOR OGUNTAYO

Frontend Software Engineer (Nigeria)

Highly skilled frontend developer with expertise in React.js, Redux Toolkit, and modern UI libraries like Tailwind CSS, DaisyUI and ShadCN. Proficient in translating Figma designs into responsive, user-friendly web applications. Adept at state management, API integration using Axios, and creating seamless user experiences. Strong problem-solving skills and a passion for delivering clean, maintainable code. Currently expanding knowledge in backend development with Node.js to become a well-rounded full-stack developer.

WORK EXPERIENCE

Frontend Developer Swift Technology Solution Services, Nigeria January - Present

- Created and executed visually appealing and intuitive user interfaces for digital products, such as websites
- produced reusable components ranging from high-quality coding to wireframes and prototypes.
- worked together to guarantee code quality with cross-functional teams made up of product managers, UI/UX Designer, and backend engineers.
- Conducted user research and usability testing to gather feedback and insights from users
- Worked with group of developers in delivering high quality market-product such as **GOTIPMI**
- Translated design mockups and prototypes into clean, efficient code using modern Frontend technologies

Frontend and webflow developer freelance Jan 2023 - april

- Designed a figma template for the creation of a website.
- Converted the above design into responsive webflow website
- Collaborated with cross-functional teams, including developers and stakeholders, to address technical challenges
- Conducted regular code audits to ensure enforce coding standards

EDUCATION BACKGROUND

B.Tech Remote Sensing and GIS
Federal University of Technology Akure,
Nigeria, 2018 - 2023
